DETAILED ACTION

Election/Restrictions

1. Claims 5,6, and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/11/06.
2. Applicant's election without traverse of Group I-Claims 1-4 and 7-12 in the reply filed on 1/11/06 is acknowledged.
3. Below is an action on the merits of claims 1-4 and 7-12.

Specification

4. The disclosure is objected to because of the following informalities: Applicant is asked to update by amendment the first paragraph of the specification to reflect that U.S. patent application 10/139582 is now U.S. Patent #7,004,597.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over POOLE (6237461) in view of BADHAM (2629516) and UKE (6666566). Re claim 7, Poole shows in Fig.7; a handle unit "200" housing a deterrent spray canister "460". This handle "200" is orthogonally attached to housing which contains a flashlight "342", stun gun mechanism "98", and laser sights "342" and deterrent spray nozzle "410" (see Fig.8). See the disclosure in col.11, lines 42-55 of Poole for the discussion of light sources "342" for illumination as well as targeting purposes. Poole does not show the handle unit being an elongated member with the handle attached

to the proximal end of the handle unit. Poole also does not show a glass breaking mechanism housed in the handle at the proximal end of the handle unit. Badham is applied to show that it is well known in the art to attach a handle containing a spray canister to the proximal end of a handle unit containing a flashlight and a deterrent spray nozzle at its distal end. Uke is applied to show that it is well known in the art to connect a glass breaking mechanism to the proximal end of a flashlight such as Badham. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Poole as shown by Badham to provide a more elongated member for housing the flashlight and spray nozzle for the purpose and advantage of distancing the user from the deterrent spray and thus prevent accidental back spray. Further, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide on either Poole's or Badham's handle a glass breaking mechanism as taught by Uke for the purpose and advantage of providing a glass breaking function to their respective flashlights. Re claim 11, note in Fig.10 of Poole the plurality of deterrent spray nozzles "62".

Allowable Subject Matter

8. Claims 1-4,8,9,10, and 12 are allowed.

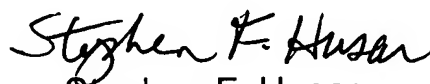

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Macek is cited of interest as showing a combination containing flashlight, spray deterrent, and stun gun.
